Brantin, April 11, 1859.—It is with the most lively acknowledgment that I offer to my filustrious friend and associate, the Superintend-ent of the United States Observatory and Hy-drographical Office at Washington, the tribute of my respectful admiration. The maratime conference at Brussels, and the happy influence which your visit to Europe has fortunately exercised, especially where your presence has been enjoyed, have contributed to spread your views concerning the means of shortening the duration of veysges through seas traversed by currents. You are now enjoying the fruits of

immense labors. It belongs to me more than to any other traveler of the age, to congratulate my illustri-ous friend upon the career which he has so

gloriously opened.

Scarcely in a state of convalescence, I must limit myself at present to offering you the tribute of acknowledgement due you for so many years.
